Volume 157 August 1985

CONTENTS

The flow at a rear stagnation point is eventually determined by exponentially small values of the velocity. LEON L. VAN DOMMELEN and SHAN FU SHEN *page* 1

Transient axisymmetric motion of a floating cylinder. J. N. NEWMAN 17

Experiments on fluid flow induced by melting around a migrating heat source. M. K. MOALLEMI and R. VISKANTA 35

On the global instability of free disturbances with a time-dependent nonlinear viscous critical layer. J. GAJJAR and F. T. SMITH 53

The deflection of a baroclinic jet by a wall in a rotating fluid. J. A. WHITEHEAD 79

The stability and energetics of corotating uniform vortices. DAVID G. DRITSCHEL 95

The transition to wavy Taylor vortices. C. A. JONES 135

On the structure of jets in a crossflow. J. ANDREOPOULOS 163

On a submerged sphere in a viscous fluid excited by small-amplitude periodic motions. S. A. JENKINS and D. L. INMAN 199

Nonlinear Kelvin–Helmholtz instability of a finite vortex layer. C. POZRIKIDIS and J. J. L. HIGDON 225

Inviscid compressible flow with shock in two-dimensional slender nozzles. C. Q. LIN and S. F. SHEN 265

Bifurcation phenomena in flows between a rotating circular cylinder and a stationary square outer cylinder. T. MULLIN and A. LORENZEN 289

Characteristics of a trailing-edge flow with turbulent boundary-layer separation. B. E. THOMPSON and J. H. WHITELAW 305

Finite-difference simulation of nonlinear ship waves. HIDEAKI MIYATA and SHINICHI NISHIMURA 327

On the enhancement of centrifugal separation. H. P. GREENSPAN and M. UNGARISH 359

A separated-flow model for collapsible-tube oscillations. CLAUDIO CANCELLI and T. J. PEDLEY 375

Developing turbulent boundary layers with system rotation. J. H. WATMUFF, H. T. WITT and P. N. JOUBERT 405

A unified bar–bend theory of river meanders. P. BLONDEAUX and G. SEMINARA 449

Asymmetric flow above a rotating disk. C.-Y. LAI, K. R. RAJAGOPAL and A. Z. SZERI 471

A note on the steady high-Reynolds-number flow about a circular cylinder. D. H. PEREGRINE 493

A linear analysis of rotating stratified flow past a circular cylinder on an f-plane. LEE-OR MERKINE 501

Weakly dispersive nonlinear gravity waves. JOHN MILES and RICK SALMON 519

REVIEWS

Atmosphere–Ocean Dynamics, by A. E. Gill 532
